## LETTER OF RECOMMENDATION

Associated Rewinds has been supplying NSB with new traction motors (DC) for our Class 69 EMU's. The total delivery of more than 200 units has been a success for NSB.

The project that Associated Rewinds has carried out, relates to development of new and better solutions to internal mechanical parts and mechanisms, in addition to the complete rewind work. They have also assisted in troubleshooting when other problems have occurred in the train set which could inflict damage or bad performance to the traction motor.

The delivery has been carried out earlier than planned and the project is finished within the economic frame agreed in the contract.

Best regards

A handwritten signature in black ink, appearing to read "Alf-Bjarne Rosseland", is written over the typed name.
